

Medical MEG-A800M08S and MEG-A1K2MxxS Module Series Product Change Notice

To improve communication performance and reliability, design changes have been implemented for the MEG-A800M08S and MEG-A1K2MxxS module series used in MEG-A Series configurable power supplies. Details of the changes are provided in the table below.

Comprehensive testing and verification have been conducted to ensure consistent product performance and reliability following these design changes.

If you require any further clarification, please refer to the latest specifications on the PSU.deltaww.com website or reach out to us via our [Contact Us Form](#).
